Stencil It!™ Demo Read Me
Point & Click Graphics for the Artistically Challenged

Thank you for using Stencil It! for MacOS®, the easiest way to create powerful graphics even if you can't draw a straight line.   With hundreds of pre-made, intelligent Stencils, anything from network diagrams to party invitations to web pages can be made easily and stylishly.

Stencil It! is available through better resellers and mail-order houses world wide and is available directly from Kaetron Software Corp.   Please contact Kaetron at (800) 938-8900 or (713) 298-1500 to find the dealer nearest you.

Kaetron may also be contacted via our web site (www.kaetron.com) or via e-mail at info@kaetron.com

While The Stencil It! Demo does not include a manual, the extensive on-line help is included, and is available from the Help menu near the rightmost edge of the menu.   Please consult the on-line help for any questions about features in either the full product or this demo version.

This Stencil It! Demo allows you to create and edit documents to give you an idea of how you can use Stencil It! for your drawings, but it is limited.   The following additional features are available in the complete Stencil It! package:

•
Exporting charts to Web It!

•
Spell Checking

•
Saving

•
Copying/Pasting

•
Exporting Drawings as PICTS

Stencil It! ships with hundreds of Stencils which are also not included in this demo version.   For a few ideas about what we ship with Stencil It!, see our included examples and Quick Start Templates or look at our published examples on the web (www.kaetron.com/stencil_it.html)

System Requirements:
Stencil It! requires System 7.0 or newer and 1.5MB of memory. Stencil It! requires Color QuickDraw.

For more information, consult the manual, see the examples, look at the on-line help, or dive right in and Stencil It!
