Super Mac Freecell

Version 1.1.1 April 10, 1997

System Requirements

Super Mac Freecell requires a Mac running system 7.0, 1700k of free RAM, and a Color Monitor

How to play Super Mac Freecell

Freecell is played using an ordinary deck of cards.

The Playing Field consists of three areas:

Foundations -- These are the four initially empty cells on the left of the tableau. They are each built up from Ace to King of a given suit. When all four foundation sequences have been successfully built, the game has been won.

Playing Columns -- These contains 8 columns of cards. One card may be moved at a time from this area to the foundations or the Freecells.

Freecells -- These are the spaces next to the Foundations which are used as temporary holding cells for cards. Each cell may only hold one card at a time, and any card may be placed there from either another Freecell or a playing column.

Playing the game

The objective of Freecell is to move all of the cards from the central playing columns to the foundations.

Any card not covered by another may be moved from its column to an unoccupied Freecell.

Any card not covered by another or in an Freecell may be moved to the bottom of another column, provided that the column is empty or the bottom card of the column is of a different color and one value higher in sequence. Aces have a value of one.

A card may be moved from a Freecell or from the bottom of a column to its foundation provided that the card is the next card in ascending order for that suit.

The game is over when all cards have been moved to the Foundations or when no further plays can be made.

Registering

Super Mac Freecell has the following pricing.
A single user licenses is $15 per user. A Site License costs $250 (roughly equal to 27 users) and covers all locations One big advantage of a Site License is that you do not need to keep track of how many people at your site are using the software. A World-Wide License costs $500 and it covers all locations for your organization on the planet earth.

Paying for Super Mac Freecell is fairly simple. Open the Register program that accompanies Super Mac Freecell. Enter your name, your email address, and the number of single user licenses you desire for each program you wish to purchase (or Site or Word-Wide licenses). Save or Copy or Print the data from the Register program and send the data and payment to Kagi. Kagi handles my payment processing. More specifics on the Register program follow.

If paying with Credit Card or First Virtual, you can email or fax the data to Kagi. Their email address is sales@kagi.com and their fax number is +1 510 652-6589. You can either Copy the data from Register and paste into the body of an email message or you can Save the data to a file and you can attach that file to an email message. There is no need to compress the data file, it's already pretty small. If you have a fax modem, just Print the data to the Kagi fax number.

Payments sent via email are processed within 3 to 4 days. You will receive an email acknowledgment when it is processed. Payments sent via fax take up to 10 days and if you provide a correct internet email address you will receive an email acknowledgment.

If you are paying with Cash or USD Check you should print the data using the Register application and send it to the address shown on the form, which is:

Kagi
1442-A Walnut Street #392-EQ
Berkeley, California 94709-1405
USA

You can pay with a wide variety of cash from different countries but at present if you pay via check, it must be a check drawn in US Dollars. Kagi cannot accept checks in other currencies, the conversion rate for non-USD checks is around USD 15 per check and that is just not practical. If you have a purchasing department, you can enter all the data into the Register program and then select Invoice as your payment method. Print three copies of the form and send it to your accounts payable people. You might want to highlight the line that mentions that they must include a copy of the form with their payment.

Kagi can not invoice your company, you need to act on my behalf and generate the invoice and handle all the paperwork on your end. Please do not fax or email payment forms that indicate Cash, Check or Invoice as the payment method. As far as I know, there is still no technology to physical objects via fax or email and without the payment, the form cannot be processed.

Payments send via postal mail take time to reach Kagi and then up to 10 days for processing. Again, if you include a correct email address, you will hear from Kagi when the form is processed.

Protection

Super Mac Freecell has a protection scheme and when you pay, I will tell you how to indicate to Super Mac Freecell that you have paid the registration fee. If you do not have an email address, please enter your complete postal address and please remember, I do not know what country you live in so please enter that into the postal address also.
