

## What's new in Mountain High Maps version 2.5

An incredible array of easy-to-use features:

| Four-disc CD-ROM set holding 10 gigabytes of data (decompressed) in 7,500 map files.

| 78 high resolution colour relief maps with seven variations of each, providing you with more than 540 ready-made maps from which to choose, including:

78 relief maps colourised according to elevation (low contrast),

72 also with colourized ocean floor relief.

78 relief maps colourised according to vegetation (high contrast),

72 also with colourised ocean floor relief.

78 relief maps colourised according to political areas.

78 maps showing land relief in greyscale.

72 maps show greyscale land and ocean floor relief (as version 2.1).

All maps in FreeHand 7.0 format as well as FreeHand 3.1. Land relief is assigned a colour which you can change at will, with each element on a separate layer - up to 195 for each map - and all land, sea, and political

areas are pre-filled colour (the FreeHand 3.1 files have “tiled” fills for the tints, whereas Freehand 7.0 allows up to 30,000 points in a path, so it is not necessary to tile complex fills).

All maps in Illustrator EPS format with up to 195 layers, with land, sea and political areas pre-filled with colour. The coloured bitmap land relief maps can be placed as desired.

| All outline paths in FreeHand and Illustrator formats are now closed and filled.

| More than 16,000 fully-editable place names, including countries, major cities and towns, rivers, and physical land and ocean features.

| All maps with fully-editable outlines, up-to-the-minute country borders, rivers, latitude/longitude graticules, and scales in miles/kilometres.

| Styles defined for each graphic and text element in the FreeHand 7.0 files, making specific or global changes even easier.

| Styles defined for each graphic element in FreeHand 3.1 files.

| Vector layers included as Photoshop “Paths” as well as masks to colourise countries, define borders, highlight coastlines and add dramatic 3-D effects and shadows or vignettes.

| Four new maps, including new maps of Turkey, China, Korea, and the Galapagos Islands.

| World, continent and individual maps in unparalleled detail.

| 39 high-resolution globes, 15 in full colour, with colour backgrounds and cloud masks.

| 38 professionally-animated globe sequences, featuring rotations, zooms and fly-pasts.

| New cloud masks for use with “wrapped” world maps in 3D applications.

| Comprehensive interactive catalog fully revised and enhanced, showing all of the maps, globes and animations.

| Easy importation into DTP applications, maps are 300ppi files, up to 51Mb in size, for sharp imagesetter output at A4 and larger sizes.

| 72ppi files included for electronic media use.

| Royalty-free for print, broadcast, multimedia and internet graphics.
