

olorGATE is Postscript level II compatible through the 5D JAWS engine, we support ICC 2.0 Profiles that are run through the ColorSolutions ColorBlind Color management engine.

We currently support TIFF, JPEG and other raster types directly with our converting them to EPS Files

ColorGATE will work with RGB, LAB and CMYK files and will apply different colormangement to each of them.

Check out the DEMO version at [www.colorgate.com](http://www.colorgate.com)
