

In Hukchi Province your armies are ready for a powerful attack against a potentially valuable Minor Nation

To select these armies you need to scroll to Hukchi and click on the small encampment tents near the town. You see your forces in the toolbar. Use the arrows in the toolbar to select the units to attack.

If you declared war last turn you see a red crossed swords cursor over the provinces owned by the Minor Nation. Click on one of these provinces with this attack cursor and your forces are ordered to attack this turn.

If you don't see the red crossed swords, verify:

1. You declared war in a previous turn.
2. You used the arrows in the toolbar to select which troops should attack.

Only the mobile forces attack. Local militia remain in your province.
