

Changes & additions planned for later versions

- Playback of movies in any view
(it' would be extra cool to have several movies in the thumbnail view and activate them all simultaneously).
- View/play Gif animations.
- Rotate images.
- Watch folders for new images.
- More apple events. (send to catalog).
- Improve memory handling when printing.
- Multiple filter boxes.
- File info to update actual files with preview, keywords, description, icons.
- Add url in the same way as keywords and descriptions.
- Add Button to improve your love life.
- Self running catalogs.
- Support for more formats (bmp/dib, 3dmf).
- Full playback of qt movies & 3dmf models.
- Private scrapbook.
- Multi-document.
- Allow manual repositioning of files in list.

Come on! Let us know what else you want!
