Notes about GIF, JPEG, TIFF and QuickDraw 3D items:

## GIF:

You can display GIF images only if have a color capable Macintosh and have 32 bit QuickDraw.

## IPEG:

You can display IPEG images only if you have QuickTime™ installed.

## TIFF:

You cannot display TIFF images but they can be stored, sorted and exported as needed.

## QuickDraw™ 3D:

You can display QuickDraw<sup>™</sup> 3D images only if you are running a PowerMac with the QuickDraw<sup>™</sup> 3D and the QuickDraw<sup>™</sup> 3D Viewer extensions installed.

If the current item is a QuickDraw<sup>™</sup> 3D image, you can view it and manipulate the image with the standard QuickDraw<sup>™</sup> 3D controller buttons.
