7) Menu Item Explanations

Apple Menu
```
About DD...
        Opens the About Box for Download Deputy Deluxe
Register            Opens the dialogue box that you use to enter your
                    registration information and unlock Download Deputy
Deluxe's
                    features.
```

File Menu
```
Open list...      Cmd-O Opens a Download Deputy Deluxe file list. (Disabled
until you
                  register)
Save list...      Cmd-S Saves a Download Deputy Deluxe file list. (Disabled
until you
                  register)
Quit              Cmd-Q Quits Download Deputy Deluxe.
```

Edit Menu
```
Undo              Cmd-Z Undoes the previous action.
Cut               Cmd-X Cuts the selected text. If the cursor is placed in
the
                  URL field, then the parts of the URL are cut into the
                  standard URL format.
Copy              Cmd-C Copies the selected text. Copies all parts of the URL
                  into the standard URL format when the cursor is placed in
the
                  URL field.
Paste             Cmd-V Pastes the clipboard text into a selected text box.
If
```

```
        the cliboard contains a URL, and the cursor is in the URL
                  field, the parts of the URL get placed into their correct
                  fields.
Select All        Cmd-A Selects all of the text in a text box.
Duplicate Previous Cmd-D Duplicates the previous file information.
```

Deputy Menu
```
URL Grabber
```

```
    Cmd-U This turns on Download Deputy Deluxe's URL Grabber. From now,
                       until you uncheck URL Grabber, every FTP file URL you click

                       on in Internet Explorer or Netscape will automatically be
                       added to Download Deputy Deluxe's queue. This way, you can
surf the
                       internet at top speed without file downloads slowing you
                       down. Later, just click the "Go!" button in Download Deputy
Deluxe
                       to download all files you clicked on.
Begin Download     Cmd-B Begins a download session.
Begin Upload       Cmd-U Begins an upload session.
Download Options   Cmd-F Opens the Download Options window.
Upload Options     Cmd-J Opens the Upload Option window.
Delete Item        Cmd-, Deletes the selected item from the queue.
Clear Queue        Cmd-' Clears the queue.
Go to DD Home...   Cmd-H Launches your web browser and opens Download Deputy
Deluxe's
                       home page.
Bug Report         Cmd-R Launches your favorite email program and creates a
bug
                       report message to send to the Ilesa Tech Team.
