

Links LS for Macintosh Demo Readme
Copyright (C) 1997 Access Software
Software conversion by Green Dragon Creations, Inc.

To install the LINKS LS demo, double-click the Links LS Installer Icon.

This demo contains most of the game-play features that are available in the full Links LS for Macintosh package. Network play is supported between other Macintosh computers using this same Links LS for Macintosh Demo. There is no multimedia with this Downloadable demo.

Memory Requirements

The amount of memory that Links LS requires depends on the resolution and color depth your system is in. You can check your resolution and color depth by clicking on the Apple logo, moving to CONTROL PANEL, and selecting MONITORS AND SOUND. The following table will show you how much memory you need for each resolution and color depth.

Resolution	Colors	Memory
800x600	Thousands	20000
800x600	Millions	23000
1024x768	Thousands	23000
1024x768	Millions	26000
1280x1024	Thousands	29000
1280x1024	Millions	35000
1600x1200	Thousands	35000
1600x1200	Millions	42000

To change the memory that LINKS LS is allowed to use, you must first have Links LS installed on your hard drive. Open up your hard drive, open the Links LS folder, click on the Links LS icon and then push CMD-I. Change the minimum and preferred memory size to the number above matching what your system is set up. If your resolution is not set on one of these numbers, use the next lowest. For example, if your monitor is using 832x624 resolution, choose 800x600.

Links LS will not run in any resolution lower than 800x600 or higher than 1600x1200.

Links LS doesn't use the full screen. What am I doing wrong?

If Links LS is not filling your entire screen, you are not in one of the exact resolutions that is listed above. If you are not in one of these resolutions, Links LS will use the next smallest size and adjust the screen to fit accordingly. To make Links LS fill up the entire screen, go to Control Panels

and select Monitor. Here you can change the resolution and color depth to your preference. Make sure you have enough memory to support the resolution and colors you put your monitor in!

If you are interested in purchasing the full version of Links LS for Macintosh, you can contact Access Software Orders at (800) 800-4880 or by fax at (801) 596-9128.
