

Information presented on the offer sheet beneath the map informs you of the type of offer your Foreign Minister received.

While looking at the sheet, the map provides geographic information about the countries involved. For more information use the Blue "i" tab on the left of the offer sheet. Once you have brought up the "i" tab you obtain information on this screen by selecting various countries and using the icons in the lower-middle part of the screen.

Most of this information is similar to what you obtain when conducting diplomacy. However, during this offers phase you are able to see small icons on the map representing all the current diplomatic offers of all the Great Powers.

This information should aid you in advance planning. For example, while considering an offer of alliance from one power, you can look at the map and see that you will receive an offer from another power as well.
