

Most of the pictures do something. Click on them!

Apple Wizards issues have lots of icons in them because they quickly convey a lot of information in a small amount of space.

Instead of keeping a bunch of custom folders to save the icons, Apple Wizards uses Icon Archiver. Icon Archiver, programmed by Alessandro Levi Montalcini, can be found at <http://persoweb.francement.fr/~alm/>. If you have lots of icons, then Apple Wizards encourages you to check out Icon Archiver for yourself.
