The ftp site "ftp.spies.com" where there is a cumulative list at /Library/Techdoc/Micro/macintos.sec.   The Gopher site is "wiretap.spies.com.".   The information obtained for this list was from various people who responded.

Also included are bits and pieces from compilations by Bryan Kending (bskendig@netcom.com), James Wang (jwang@csua.berkeley.edu), and Ngai Chi-ho (ngai-chi-ho@cuhk.hk).   Gregory Jewett's (jewettgs@potsdam.edu) The Newton Handbook also contained a couple Newton eggs, but I found many more at one of Harry's pages (scheirich@cg.tuwien.ac.at.).

Icons are from Gordon Werner's (FlyPBA@eWorld.com, flypba@netcom.com, flypba@aol.com) collection.

I found certain easter eggs first at the above sights, but have been to plenty of other places.   I cannot label each egg according to whoever provided it in this version because I forgot to write it down, but I will include acknowledgements in the next version.
