Thank you for trying PhotoGIF Lite™!

PhotoGIF Lite™ is a shareware version, of the number one power tool for Web graphics. It shares many powerful features and capabilities with big brother PhotoGIF 3.0, but not all.

Else it wouldn't be a lite version.

PhotoGIF Lite™ s one of the new 3rd generation PhotoGIF Series™ plug-ins that recalls the historic shareware roots of PhotoGIF way back in '96. PhotoGIF Lite™ is a file format plug-in is a superior replacement for Photoshop's standard Compuserve GIF file format plug-in. PhotoGIF Lite requires Adobe Photoshop 3.0 or greater.

The new cross-platform PhotoGIF Series™ plug-ins means PhotoGIF™ is accessible to very nearly everyone, no matter what image editing application or platform you use to make Web graphics. When 'Web-ready' isn't good enough, PhotoGIF™ provides the 'Web-mastery' you need. In addition to PhotoGIF Lite™, the PhotoGIF Series™ includes PhotoGIF™ (3.0), PhotoGIF Filter™, and PhotoGIF Illustrator™. All are based on the 3rd generation feature set, though since some are new plug-ins never before available, there are 1.x version numbers on 3 out of 4.

The second generation of PhotoGIF™ was named a '96 MacUser Eddy Award Finalist in the Best New Production Tool class and rated 4 1/2 Mice by MacUser - unquestionably great stuff. The PhotoGIF Series™ blows it away. The best has gotten exponentially better.

New for PhotoGIF Lite™:

• Fully functional shareware
• Live file size display
• GIF comments support
• Automatic image tags in Finder comments
• Dialogs remember last used settings
• Saves lists of background colors
• Zoom-able preview
• More intuitive and streamlined interface
• Improved transparency tools

Additional information on the new capabilities in PhotoGIF Lite™ and the other plug-ins in the PhotoGIF Series™ can be found at the BoxTop Software, Inc. Web-site at:

http://www.boxtopsoft.com
