About this patch...

This patch updates MT-NewsWatcher 2.4.0 to 2.4.1, which fixes a couple of bugs (see below). To apply the patch, click the 'Patch' utton below, and select your copy of MT-NewsWatcher 2.4.0. The patched application will be placed in this same folder. After applying the patch successfully, you should move the old 2.4.0 version to the trash.

Bugs fixed in 2.4.1:

- Fixes a problem where line counts showed up as '?' in subject windows.
- ixes a problem where References headers over 1000 characters long could be generated.
