

# hot door Transparency

for Adobe® Illustrator® 8  
for Macintosh or Windows

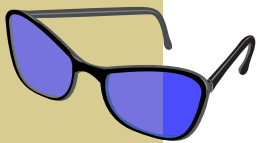

only  
\$39

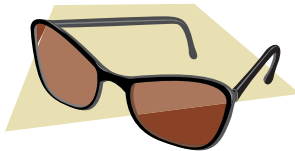

## At last... live transparency effects in Illustrator!

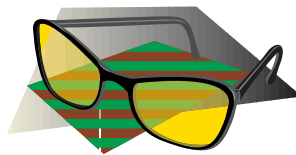

Hot Door Transparency turns Illustrator 8 artwork into transparent lenses which can be moved and edited with ease! Create dazzling new effects by overlapping text, objects, and unusual colors. And for the first time, you can change the shape, color or location of artwork while maintaining the transparent effect!

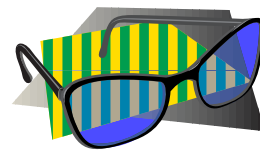

Use the Transparency palette to quickly adjust transparency with a live preview

Change the color of your "lens" or artwork and instantly view the result

Create transparency effects over gradients, patterns, text, and meshes

Edit or move artwork while maintaining transparency

Add multiple transparent lenses for new effects and illusions
