The Command Line Window

The Command Line is included for your convenience.   Any valid AppleScript command can be typed into this window and executed 'ad hoc'.   This obviously includes any XTension phrases.

f you type in this command, with the example database, and then push 'Do It' , you will see the "Foyer Chime" appear in the scheduled events window and in 5 minutes, you will see the "Foyer Chime" turn ON.

The next page shows how you can issue an even more primitive X-10 command :
