

# Mavicadabra! 1.1

©1998 by Timothy M. Brown

What is it?

Mavicadabra! is a utility for owners of Sony Mavica digital cameras which speeds up the process of copying and renaming files from Mavica floppy disks to a Mac's hard drive. Mavicadabra! can even convert files to Macintosh PICT format, create QuickTime previews, add a thumbnail icon, change the file's creator type to that of your preferred graphics editing/viewing application, split multi-images into 9 separate files, add a timestamp, and create index pictures. Index pictures can even be created in Pictodex format to make image selection and editing even easier! (a preview version of the Pictodex Viewer is included with this release)

Mavicadabra! is designed for use with the FD71 but should work with the FD5, FD51, FD7, FD81, and FD91 models as well.

How much does it cost?

Mavicadabra! is free to try out for 7 days. If you wish to continue using it after that time, you can purchase a single-user license for \$20.00 which includes free upgrades to all future versions of Mavicadabra!. This license entitles one individual to use Mavicadabra! on one computer. You can purchase a license by either of the following methods:

[Cash, Check, Money Order \(US Funds\):](#)

If you would like to pay by cash, check, or money order (in US funds), make your check or money order payable to Timothy M. Brown, and send it to:

Timothy M. Brown  
137 North Avenue  
Syracuse, NY 13206-2830

Be sure to include your name, address, email address, the name of the program(s) that you are registering, and the number of copies of each.

[Credit Card \(WWW\):](#)

If you would like to pay by credit card on the web, you can purchase a license by visiting:

<http://order.kagi.com/?GB>

Online orders are processed by the Kagi processing service. There is an option for a secure transaction and this method of payment is fairly fast; turn around time for orders is usually less than 24 hours.

Thanks for trying out Mavicadabra!
