

PPrep • FPO TBox - No Print

©1995 Nythhawk Productions

This script will suppress the printing of text boxes containing the text “•FPO•”. It will indicate that printing has been suppressed for the text box by placing a blue border around the box.

It is an example of:

- 1) using an “every... whose” qualifier as a way to filter through all text boxes in the document to find only those containing certain text.
- 2) using a “tell” statement to address a group of elements
