PPrep • FPO TBox - Print
©1995 Nyhthawk Productions
This script will allow the printing of text boxes containing the text "•FPO•".
Any previous suppression indicator frame will be removed.

It is an example of:
1) using an "every… whose" qualifier as a way to filter through all text boxes
in the document to find only those containing certain text.
2) using a "tell" statement to address a group of elements
