The XTension SpeedOpen 2.0.3 adds the following functions to QuarkXPress™:

1. You can choose, whether all documents should be opened with their own settings or with those contained in the XPress preferences file. This avoids the QuarkXPress dialog indicating differences between document settings and XPress preferences.
2. SpeedOpen is able to automatically enable or disable the "Greek pictures" settings. This lets you open documents more quickly, because you don't have to wait for the display of the pictures. This feature is also helpful in cases where the picture data contained in the document is damaged, such that display of the pictures causes system errors.
3. SpeedOpen is able to automatically set the view size of a document to a predefined value. For example, you can open all documents in "Fit in Window" view, no matter in what view size the documents were last saved.
4. SpeedOpen is able to display a warning when you use a new version of QuarkXPress to open documents or libraries that have been last saved by an older version. Once you save such a document or library with the new version, it can not be opened in the older version anymore.
5. SpeedOpen lets you modify the language attribute of a document. You can use this feature to set the language of a document created by a different international version of QuarkXPress to the language of your QuarkXPress version. This avoids the warning about missing hyphenation when opening the document. Conversely, you can set a document that you've created to a different language and thus prepare it for use with different international versions of QuarkXPress.

For further explanations to features 1. to 4., please refer to the topic "SpeedOpen Settings". Details on feature 5. can be found under the topic "Hyphenation language".

SpeedOpen 2.0.3 is Shareware

You may use and test SpeedOpen for 30 days for free. After that time, you have to register your copy of SpeedOpen if you want to continue to use it. For details of the registration please refer to the topic "How to register".
Your registration directly supports the further development of SpeedOpen. With your registration, you help to implement new features (some already projected) into the next versions of SpeedOpen. If you like SpeedOpen 2.0.3, you'll like the new features of the next version even better.

You may copy and distribute the unregistered version of SpeedOpen as long as you do not change, add or remove parts of the program, and as long as you don't charge any fee for the distribution.
A registered copy of SpeedOpen may be copied for archiving and data security purposes only. The number of copies of the registered version that may be used simultaneously is limited according to your Shareware license (cf "How to register").

SpeedOpen is Copyright 1993-97 by Tobias Boskamp, Germany. QuarkXPress™ is a trademark of Quark, Inc., Reg. U.S. Pat. & Tm. Off. XTensions™ is a trademark of Quark, Inc.

SpeedOpen was created by Tobias Boskamp. Many thanks to Mary Jo Kostya, who helped with the english documentation, to Ben Taylor for his support during the development of the program, to Eerk Hofmeester, who provided the colour icons and the translation into dutch, and to alap for the splash icon code.
