

This only covers the basic controls of the main game. For more detailed help or for help setting up, read the instructions.

Keypad right - Activate circuit to right

Keypad left - Activate circuit to left

Keypad up - Increase charge of activated circuit

Keypad down - Decrease charge of activated circuit

Numbers 1 through 9 - Activate corresponding circuit

Return - Send pulse

After a pulse is sent, numbers will appear next to S and C. The number next to S is the number of correct strength charges delivered, and the number next to C is the number of correct strength charges delivered to the correct circuit. The pad at the left side of the screen shows all of the pulses you have sent and their S and C values.

(Press any key to continue.)
