# Hannah Ware

for the Creative Creatures

Illustrator 8™
Calligraphic Brushes

Volume 1

Calligraphic Brushes

for

Illustrator 8[TM]
Volume 1

Introduction

Thank you for purchasing HannahWare's
Calligraphic Brushes Volume 1. Since 1990
Z-Graphics Inc. has contracted and assisted
with a wide variety of developers. We continue to
enjoy providing our development customers
within the fields ERP, Health Care, Multimedia,
Operating Systems, Communications, and
Computer Based Training with time saving
solutions. Similarly, we hope our solutions
save you time and fit your needs.

We believe your purchase allows you to allocate
more time to the creative aspects of illustrating
by increasing the size and complexity of digital
assets readily available for production. It's simple,
the availability of assests are key factors in the
computer graphics and design field. (For example: an
image manipulation expert loves having photo stock,
the video expert loves having a base of video clips, and
the desktop publisher desires a base fonts.) Believe it or
not, investments in digital assets at the least save time
and increase productivity.

Purchasing our product provides you with a base
of calligraphic brushes or pens for your favorite
illustration package. An illustration package needs
thousands of Calligraphic Pens to allow more variables
in the artwork or illustration being creatively produced.
Furthermore, with a large library of pens changes to
drawings can be made quickly without the hassle of
making new brush sets from scratch.

Installation
(using two different methods)

Illustrator brushes or pallets are stored inside the Brush Libraries folder or may be installed while Illustrator is running. The illustration below displays where to install brushes if you want Illustrator to recognize the brush strokes upon startup. Please see the tutorial before installing a large number of brushes in this folder.

Adobe Illustrator® 8.0

14 items, 142.2 GB avai

- Adobe Illustrator® 8.0

- Swatch Libraries
- SimpleText
- Brush Libraries
- Help
- Utilities
- Action Sets
- Read Me
- Plug-ins
- Sample Files
- Other Libraries
- RB2Connection.mac

Installation Method 1 (Installation using the "Brush Library" folder)

Installing brushes inside the Brush Libraries folder enables Illustrator to display your calligraphic pens within pallets and enables you to choose brush sets from a menu. Within Illustrator select "window" and scroll down to Brush Libraries. Your menu should look similar to the menu below. Depending on the number of brushes already installed your screen may look a little different.

| Window	Help
New Window	
Hide Tools	
Show Info

Show Layers	Artistic Sample
Show Navigator	Border Sample
Show Attributes	Calligraphic
	Default
Hide Transparency	Floral Sample
Show Actions	Object Sample
	Other Library...

Installation Method 2
(Installation using "Other Library")

If the Illustrator application is running you can import pallets or brush sets by selecting the "Other Library" option under Illustrator's window menu. Selecting "Other Library" will open a dialog box allowing you to choose a path to the brush set. Installing brush sets in this manner reduces the size of the menu considering Illustrator will not look for brush sets outside of the Brush Libraries folder when starting up.

Installation Method 2
(using "Other Library" cont.)

If you use the dialog box method the dialog box below may look familiar. Just remember you are selecting a library to use so you must route a path to the specific HannahWare Volume.

Select a library to open:

HannahWare™ Volume 1 C... ⬍	☐ Cheetah
📘 About HannaWare Caligrap...	Eject
📕 The 00's	
📕 The 05's	Desktop
📕 The 10's	
📕 The 15's	Cancel
📕 The 20's	
The 25's	Open
📕 The 30's	

Scroll Down and select the following folder or a brush folder set you desire to use. If you select the folder with the name "The 25's" you will be selecting calligraphic pens with a 25 degree angle. The highlighted brush below has a 25 degree angle and a roundness of 75%.

Select a library to open:

The 25's ⬍	☐ Cheetah
📄 CalPen 25 Angle 55 Round	Eject
📄 CalPen 25 Angle 60 Round	
📄 CalPen 25 Angle 65 Round	Desktop
📄 CalPen 25 Angle 70 Round	
CalPen 25 Angle 75 Round	Cancel
📄 CalPen 25 Angle 80 Round	
📄 CalPen 25 Angle 85 Round	Select
📄 CalPen 25 Angle 90 Round	

Installation Method 2
(using "Other Library" cont.)

Illustrator should import the file and draw a pallet that you can use for making strokes. If you chose the same file used in the previous steps your pallet should look similar to the one below. Add as many pallets as you desire using this method to achieve the result your looking for. If you ever decide that there are a particular sets of brushes or pens you use often then it is beneficial to put them in the Brush Library folder so they will launch when Illustrator starts. As you may already know the tabs on the pallet below are movable so you can mix and match your brush sets. In the pallet below there are three different brush sets to give you an idea of the possibilities.
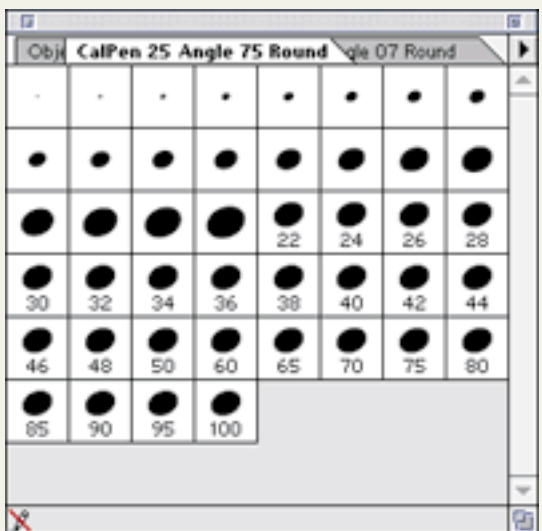

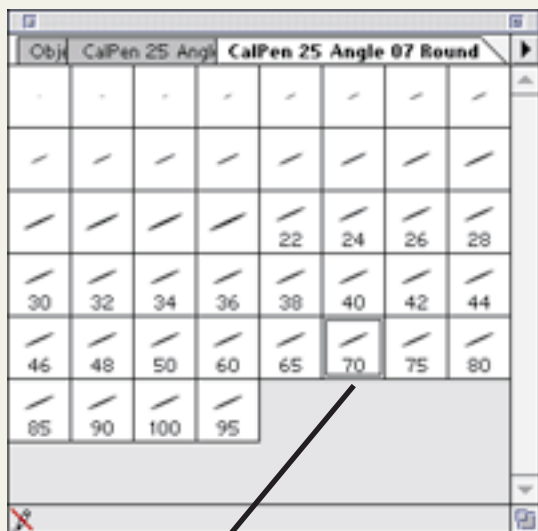

Making Changes to the Strokes

Your HannaWare Volume contains many pen or brush sizes which save you the headache of making a multitiude of brushes from scratch. It is not possible to include all variations of a brush or pen so you may need to adjust the settings of a particular brush. If you need to change the characteristics of a pen or brush use the following steps.

Drag the item you want to change from the Cal Pen pallet to the "Brushes " pallette.
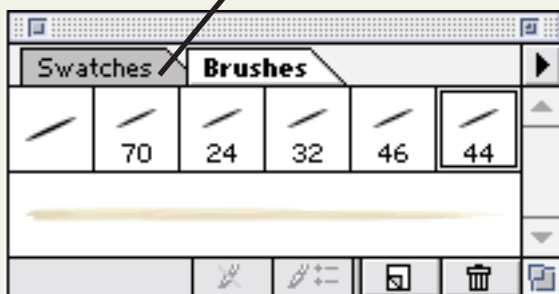

Making Changes to the provided strokes brushes or pens (cont.)

Draging and droping a selected pen or brush from a HannahWare set to the brushes pallet allows for creating a new brushes. Once a HannahWare pen is placed in the brushes pallet it becomes a brush or pen that may be edited. By double clicking on a new brush a dialog box similar to the screen shot below will pops up. Within this dialog you may change any of the variables not included with the original HannaWare set.

Tool Bar Settings

The following information will aid in setting up the tool bar for using calligraphic pens.

You can use the illustration tools to achieve different effects.

When using the Calligraphic Pens you should make sure the fill box is set to none. The red stripe within this box is set to none.

You can change this setting by selecting the fill box and pushing the None button or by pressing the (/) key on your keyboard.

File Management (Do's Dont's & Info)

Allowing all of your brushes to reside on your
hard drive will take approximately 40-60MB
of space. Please have the respective amount
of space available before unstuffing your
product.

Do's....

Try to keep all your brushes available
for quick access.

Back up your brushes as a compressed file.

Call or E-mail us if you have any difficulties.

Dont's...

Try not to keep a large number of brushes in the
brush libraries folder. Large numbers of brushes
in this folder will increase the menu size. You
will be able to narrow down particular or favorite
brush sizes to use in production. Once you have
found your favorite sizes place them in the
brush libraries folder. You will then be able to
access those brushes quickly.

Upgrades and Special Offers
and New Releases

Our development group is currently working on brushes and strokes for Illustrator, Painter, and Freehand. Our next volume for Illustrator will be released in December of '98. Volume 2 will include a large variety of free form strokes similar to the brush stroke within this manual (on the left border).

Individuals who purchase a volume through www.unboxed.com will receive 10% rebate off the next volume purchased which includes a free set of fonts for the Macintosh.

To receive your rebate and fonts mail, e-mail, or call with the following information:

Name
Company
Address
E-mail
Telephone

At this time fonts will be delivered by e-mail only. Your rebate check will be mailed through U.S. mail after our distributors deliver your electronic registration information. Please allow a little time to receive your fonts and rebate check.

We will also mail you a CD-ROM containing all purchased libraries, fonts, and other special offers after you purchase a third volume.
