

## FlightCheck Report

### Printing a Report

After a document has been scanned and the Main window is active, Select "Print Report..." from the File menu and the Report preferences window will appear.

Choose the items you would like to include in your report by checking the appropriate boxes. For colors, fonts and images you can also select which particular "view" from the pop-up menus that you would like to use for the report.

Upon clicking the Print button, you can then choose to print in color (problem items will print in red), as well as choose the font for the Report.

### Detailed Usage

Check the Detailed Usage box to include the attribute icons in the printout.

### Include Legends

Check the Include Legends box to print the legends (explanations) for the attribute icons.

### Saving a Report

To save the Report to a text file, which allows you to then import the text file into an editor, select "Save Report..." from the File menu.
