

Installation

Installing Solitaire Till Dawn

Installing is easy. Just copy the files Solitaire Till Dawn and ColorCards onto your hard disk. They can go in any folder, so long as they both go into the same folder. Be sure not to change the name of the ColorCards file.

You'll probably want to copy the rest of the Solitaire Till Dawn package as well: this document, the Games Guide, the Sample Games folder, and the Read Me file. But they are optional; only the ColorCards file and Solitaire Till Dawn itself are required for play.

Requirements

Solitaire Till Dawn requires System 7.0 or later. A monitor at least 13" in size and displaying at least 256 colors is recommended, although the program will run on any size monitor and at any color setting including black and white.
