

System Requirements

You must have the following resources to use the Quicktime Effects Pack:

Power Macintosh

MacOS 7.0 or later

Quicktime 3.0 or later

6Megs free RAM or more for video editing software.

Installation

Installing the Quicktime Effects Pack #2 is simple. Just drag and drop the Effects Pack #2 icon on your system folder. Then restart your computer. The effects should now be available in any Quicktime application that supports effects, such as Movie Player Pro or Quicktime Player Pro.
