

## Effects Pack #1

Effects Pack #1 is a set of 6 filters and 4 transitions you can use to further spice up or fix up your movies. It includes the following effects:

- Camcorder - Makes your movie look like it's being filmed through a handheld camcorder viewfinder.
- Color Pass - Turns your movie black and white except for 1 color you choose.
- Color Replace - Turns any single color into another color.
- Contrast and Brightness - Adjusts the contrast and brightness of your movie, and changes it using the tween-able parameters. You can use it to create cool fades!
- Negative - Turns your movie into a photonegative.
- Video Noise - Adds static for effect, or to smooth out stair-step gradients caused by compression.
- Cool Transitions - 4 psychedelic transitions to spice up your cuts.

Owners of Effects Pack #2 can get Effects Pack #1 for half price!

You can download a free 30 day demo at  
<<http://www.buena.com/effectspack.html>>.

## Transition Maker

Transition Maker allows you to create your own stand-alone Quicktime transitions from a Quicktime movie. It requires no programming knowledge, and you can even share your transitions with others.

You can download Transition Maker at  
<<http://www.buena.com/transmaker.html>>.

## Stomp Box Delay

With Stomp Box Delay, you can turn your Mac into a realtime stereo digital delay. Just plug in your microphone or favorite instrument and start jamming! You can use it for recording or live performance, and it even works with your favorite sequencer.

You can download Stomp Box Delay at <<http://www.buena.com/delay.html>>.

## Stomp Box Tremelo

With Stomp Box Tremelo, you can turn your Mac into a realtime stereo tremelo. It works just like Stomp Box Delay- just plug-in, and start jamming! Create warm vibrato-like effects or jarring rhythmic sounds. It's great for adding spice to any type of music.

You can download Stomp Box Tremelo at  
<<http://www.buena.com/tremelo.html>>.

### Free stuff!

We also have a ton of free audio and video tools you can download, including:

- Mirage File Transfer - transfer sounds to and from your Ensoniq Mirage keyboard
- Cool Gradients - Create stunning transitions using Quicktime's Gradient Wipe effect with these images. It also works with Adobe Premiere's Gradient Wipe transition!
- AltiVec Effect - A Quicktime effect which uses the G4's velocity engine (also known as AltiVec) instructions. It comes with complete source you can use to create your own effects, or just learn about the G4.
