

Introduction

Imaja Reminder™ is a tool to organize your schedule, phone directory, and to-do list. It has three main areas for storing information:

- Calendar: including time-oriented windows such as Month, Week, Day, Hourly
- Phone directory: including names, addresses, phone numbers, and notes
- To-do list: unscheduled items

Reminder's easy-to-use interface lets you drag items from one area to another to schedule them. You can record sound into Reminder events, saving you time if your hands are busy. Reminder can use the Macintalk speech synthesizer to speak information to you, including things to do and phone numbers.

Imaja Reminder is available from Imaja for \$50.
