

Getting Started

Introduction

Thank you for purchasing OLDUVAI's ArtClips™, a very special collection of high quality PostScript images.

We are proud to offer you this collection of images that received 4 Stars in MacWorld magazine and we hope that you can put these images to productive use.

This Special Edition of ArtClips™ includes ArtSymbol™, clip art that is built into a font. ArtSymbol™ images range from arrows to balloons allowing you to "type" images, with a wide range of instant clip art pictures at your fingertips.

We'd also appreciate any feedback or ideas that would help us make future clip art and font packages work to your benefit.

Write, fax or call, we value your input.

ArtClips™ includes:

- ArtClips™ Images — ArtClips™ is not copy protected, so you can duplicate the images as detailed in the Macintosh Owner's Manual and place the original disks in a safe place. All Images are organized in Folders by category.

NOTE:

Remember that you are allowed to make only one backup copy of ArtClips™ and that you must purchase one copy of ArtClips™ for every computer where you want to use it. If your company needs additional copies of ArtClips, please contact OLDUVAI for more information.

- ArtClips™ Online Manual — This manual includes useful information on how to use these images.

Hardware and Software Requirements

You can use ArtClips™ with any PostScript printer such as Apple's LaserWriter.

We recommend that you use a Macintosh with at least two megabytes of memory. Some highly complex clip art images demand more memory when printing with some applications.

Be aware that to take full advantage of ArtSymbol™ in non-PostScript printers you should:

- Use the TrueType version of ArtSymbol (included in your ArtClips™ Disks) under System 7

or

- Use the PostScript Type 1 version of ArtSymbol with ATM (Adobe Type Manager) with any System version.

ArtSymbol™ works best with System 6.0, or later, which uses LaserWriter driver 5.2 or later. Earlier versions of the LaserWriter driver don't download fonts automatically.

You should use the latest Font/DA Mover version (3.8 or later) to install screen fonts when running under System 6.x or previous versions of the System.

[OLDUVAI Technical Support](#)

If you have any questions or are in need of technical assistance, our experienced Technical Support Group is available Monday-Friday, 10AM-6PM eastern time at (305) 670-1112. OLDUVAI's Technical Support Group is also available to answer questions on AppleLink D0283, CompuServe 76004,2077 and America Online OLDUVAIGY.
