Installing ArtClips™

ArtClips™ features over 280 high-quality EPS images.
OLDUVAI ships ArtClips™ in folders organized by categories that will put hundreds of high quality PostScript images at your fingertips.
In addition, this special CDROM edition features all the images in PICT format as well, in case that you want to use them in applications that will not accept EPS images.

We organized the ArtClips Collection in Folders.
There are two folders that hold the same images (with the same organization) in EPS and PICT Files. Please open the folder of the format you want to use and you will find several folders organized in categories.

Abstract
Animals
Food
Maps
Miscellaneous
Olympics
People
Tools.
Computer
Pictograms
Sports
Transportation.
Architecture
Business
Decoration
Electronics
Home
Office
Stationary

The ArtSymbol Font is located in a separate folder.

To install any clip art folder in your hard disk:

• Locate the images you want to copy in the appropriate format by opening the folder that corresponds to the category.

• Move the image(s) to you hard disk by dragging them onto it.

• Use all clip art files in the folder in any EPS or PICT compatible application

(depending on the format you choose).
