

# Registration

## AutoMenus Pro Demo

When you initially receive AutoMenus Pro from an online service, CD-ROM, or other form of distribution, it is in a demonstration state. This demonstration is provided to enable you to evaluate the software before you buy it. The demonstration will give you a warning each time you start your computer that you are using a demonstration copy of AutoMenus Pro. There are no other restrictions.

Once you register, you will receive a keycode which will transform your copy of AutoMenus Pro from the demonstration to the full unrestricted product. This keycode is entered in the registration dialog which is available in the AutoMenus Pro Control Panel.

## How Much Does it Cost?

AutoMenus Pro is available to single users for \$15. Site licenses which provide for an unrestricted number of copies per site of AutoMenus Pro are available for only \$59.95.

If you are ordering from outside the U.S. or Canada, please include \$2.00 extra for additional postage and handling charges.

## How To Register

### Slow

Registration is simple, just send the registration fee along with your name and address to:

Night Light Software  
305 Orange Ave.  
Mountain View, CA 94043

There is an order form available in the AutoMenus Pro Control Panel and here in this documentation to aid you in filling your order. Please print clearly so we may correctly and promptly fill your order.

Make checks payable to: Night Light Software.

### Fast

You can fax us your order form to get the quickest possible response. For fax orders, we require you have a Visa or MasterCard. We also accept credit card orders via e-mail.

Fax Number: 1-800-717-4243  
e-mail: [ordering@nlsoftware.com](mailto:ordering@nlsoftware.com)

## Special Offer

If you are physically challenged and you find it hard to afford AutoMenus Pro, you can register AutoMenus Pro by filling out the order form and following one of three options:

1. Send what you can.
2. Send only \$1.00 to cover the postage and disk.
3. Send no money.

We here at Night Light® are always happy to hear that AutoMenus Pro is making using the Macintosh® easier for those who are challenged.
