Customizing QuickPop:

To set any options for QuickPop just click the "Prefs" button from the QuickPop Control Panel window.

Here is the description of the check boxes:

• Icon at Start-up:
   If checked, an icon will be displayed during startup.
• Apple Menu Items:
   If checked, the QuickPop pop-up menu will display
   all Apple Menu Items.
• FKEYs:
   If checked, the QuickPop pop-up menu will display
   all FKEYs in the System (but only if they are named).
• QuickPop Folder Items:
   (System 7 only)   If checked, the QuickPop pop-up
   menu will display all aliases contained in the QuickPop
   Folder (which is kept in the System Folder).   You can
   keep aliases of your favorite documents, applications,
   desk accessories and control panels in this folder for
   quick access.   If this item is not checked, the QuickPop
   Folder will not be created automatically.
• Control Panel Folder Items:
   (System 7 only)   If checked, the QuickPop pop-up menu
   will display all control panels contained in the Control
   Panels Folder.
• Monitor Depth:
   (System 7 only)   Allows you to set the monitor depth
   (colors) of the monitor the mouse is currently in when
   you bring up the QuickPop pop-up menu.
   NOTE: Changing the depth with QuickPop is temporary
   (until you restart the computer).
• Sound Control:
   Allows you to change the speaker volume.

Excluded Applications:
You can create a list of applications that cause problems while using QuickPop.   If the application is on the list, QuickPop will not be available while you are in that application.   To add an application to the list, click the "Add" button, select the application and click the "Open" button.   To remove an application from the list, select it with the mouse and click the "Delete" button.
