Adobe® Photoshop® 6.0.1 Update for English
for Adobe Photoshop 6.0 for Windows®

The Adobe Photoshop 6.0.1 update fixes a number of problems discovered after Photoshop 6.0 was released.

The most significant fixes in the 6.0.1 release include:
- The painting tool brush picker has new usability improvements including:
    - Enter brings up and dismisses the preset picker at the current mouse location
    - Double-clicking a brush in the picker selects the brush and dismisses the picker
    - The current brush is always highlighted in the preset picker
    - The current brush indicator always displays the brush size
    - The First Brush and Last Brush keyboard shortcuts (> and <) work regardless of
       whether the current brush exactly matches a preset brush
- Image clipping paths in EPS and TIFF files saved from Photoshop 6.0.1 have been modified so that software, such as QuarkXPress, is able to read them.
- ImageReady is able to save and preview animations under constrained memory conditions.
- There is no slow-down of performance when files in the Open Recent list are unavailable.
- Batch file naming works correctly.
- Export Paths to Illustrator retains path scaling.
- Using certain tools, such as the Move, Marquee, or Lasso tool, after using the Open, Save and Print commands no longer generates a Program Error dialog.
- Selecting a single color in Color Range now works correctly.
- Online help is accessible for more web browser configurations.
- New Japanese character map (CMap) files are included to resolve conflicts with ImageStyler 1.0 and PageMaker 6.5.2 Plus.
- Memory usage behavior is better on all Windows OSes; the network should no longer become unavailable when Photoshop is running.
- Showing and hiding edges for a selection no longer requires pressing Ctrl-H twice.

System Requirements
Adobe Photoshop 6.0 (English language versions only).

Installation Notes
To install Photoshop 6.0.1:
1. Disable all virus protection software.
2. Double-click the Setup.exe file.
3. Follow the on-screen instructions.

Additional Notes
This update is only for the English version of Adobe Photoshop 6.0. If you have a localized language version of Adobe Photoshop 6.0, localized versions of the Photoshop 6.0.1 update will be available in the near future. Check the Adobe Web site at http://www.adobe.com for availability.

This updater will update only the retail version of Adobe Photoshop 6.0/ImageReady 3.0 software and not any pre-release (Beta) versions. To confirm that the updater has run successfully, launch Photoshop and verify that the version number on the splash screen shows 6.0.1 and not 6.0. You will need to look at the number in smaller type just below the image. If it does not show 6.0.1, you may not have a retail version. Please contact your local Adobe retailer or www.adobe.com <http://www.adobe.com/> to purchase one.

This update is also available on CD-ROM for $20.00 US plus shipping from Adobe Customer Service. In the United States and Canada, call 1-800-492-3623. Outside the United States and Canada, please contact Adobe Customer Support for your country for pricing and availability.
