

# **SAPS Server version 3 for Windows & Windows 95**

August 1996

## **Using Windows Write to View This Document**

If you enlarge the Write window to its maximum size, this document will be easier to read. To do so, click the Maximize button in the upper-right corner of the window or open the System menu in the upper-left corner of the Write window (press ALT+SPACEBAR) and then choose the Maximize command. (The System menu is sometimes referred to as the Control menu.)

To move through the document, use the PAGE UP and PAGE DOWN keys or click the arrows at the top and bottom of the scroll bar along the right side of the Write window.

To print the document, choose the Print command from the File menu.

For Help on using Write, press F1.

To read other online documents, choose the Open command from the File menu and then select a file.

## **Known Problems**

### **1. Running on Windows For Workgroups and a PENTIUM 90**

If your computer hangs when you are using the COM port, make sure that you have the latest release of SERIAL.386, at least dated 4 September 1994.

Contact Microsoft or connect on CompuServe, GO MSL, and download WG1001.EXE which contains an updated version of SERIAL.386

### **2. Using *SAPS* with Windows debug version**

Error messages are displayed on the debugging terminal at Install initialization:

! wn Kernel: LocalLock failed

! DSHELL: Error 0006: LocalLock failed

! err DSHELL 0127:01F3: Invalid global handle: 0000

! err DSHELL->KEYBOARD GETMODULEFILENAME+D: Invalid global handle: 0x0000

! DSHELL: FatalExit(6022) at CS:IP=011F:C070 SS:BP=095F:338C

! FatalExit code = 0x6022\_

! Abort, Break, Exit or Ignore?

Ignore the messages and proceed with Install.
