Personal Applications Editor

This editor allows you to define and designate the layout of your preferred applications. You may select any application that you have stored in your computer. This selected application is assigned to a specific cell in the Editor.

You may view them and execute them quickly from the Personal Applications Float Bar.

Steps to designate an application :

1. Click the Add button to generate a new cell.
2. Press the Get From Shell button or double click on the selected cell and then select your favorite application.
3. If your application is not in a group, you may select it from Browse Files.
4. Press the Close button to end the operation.

Cut : This command cuts the contents of selected button.

Paste : This command pastes the application which was cut.

Insert : This command inserts a new cell.

Delete : This command deletes the selected cell.

Add : This command adds a new cell.
