All purchase requests will be confirmed by e-mail or phone.
Free software is available below for immediate download.

Our Internet Plug-in requires Internet Explorer 3.0+ or Netscape Navigator 3.0+.

Internet Plug-in (277K): This plug-in lets you view WIF* files directly from your browser. When you have completed the installation, try your new plug-in at our demo. Last updated Oct 8, 1997

Internet Plug-in Instructions:

Download the installation file (below)
Run the installation program
Re-start your browser.

Tip: To have better visual quality of images, set your display to True color/65536 colors (16 bits). If your display is only 256 colors, you may need to click the image to activate the color dithering.

IE usrs: The Internet Plug-in may have trouble finding MS IE plugin folder. In that case, look for a file called "npcewif32.dll" and move it to your IE plugin folder, then restart

IE.

The file may be in your root or system folder. Your IE plugin folder is normally located at C:\Program Files\plus!\Microsoft Internet\plugins
Compression Engine (Standard Version, 1Mb): This program lets you convert your images from a variety of formats into WIF*. This program has full compression capabilities and is not time limited. It is provided to you completely free of charge. Requires Windows 95 or NT. Last updated June 12, 1997

WEBMASTERS

Webmasters, be sure to use this button on your site to direct visitors to the free plug-in. Link to http://www.cengines.com/

Check out our source code for A1 Travel Agency to learn how to place WIFs on your site.
