Shipping and Handling, to be added to all orders:

UK	£1.95	_____
EU	£3.00	_____
World	£4.00	_____
Total		£____.___

The utilities disk has various small applications which run with/alongside T&C. They are:

Alarm - This is a small independant .exe wich displays as a clock/date bar on your screen, & monitors your T&C database for appointments even if T&C isn't running.
Arcmerge - Lets you merge two databases together or archive data prior to a certain date.
Dialer - Displays your telephone book & lets you autodial from your modem without T&C running.
Dremake - Re-makes your database tables in the event of a disaster....
Export - Exports T&C files to DBF format.
Menu - A drop down menu which adds itself into the chaos menus. Lets you add all your programs to it, so you can run any external programs from T&C.
Accessories - An accessories menu which contains Time & Billing and Expense tracking facilities - handy if you charge clients in your T&C address book for your time!
