

Channel Vote Help

To start a channel vote:

1. Enter the name of the channel in the channel field. All channels you were on when the program loaded will be in the drag-down box.
2. Select who you want to be able to vote.
3. Select a time after which the vote will be ended.
4. Enter the question to be voted on.
5. If you are on a channel that does not allow colors, disable **Use colors in messages**.
6. Click **Start**.

You will see Little Star message the selected channel with the appropriate information. Little Star will keep track of the votes automatically, not allowing anyone from the same ip to vote more than once. When the voting time has expired, the results will be messaged to the channel. The results will include percentages of yes and no versus the total votes received, and the number of votes received versus the number of eligible voters (based on who is on the channel at the time the vote is ended and the type of vote you set).

You cannot start another channel vote until the one in progress has ended, but you may cancel a vote at any time by pressing **Shift-F3**.

That's it!
