Some features of MPEGPlayer

MPEGPlayer is a MPEG,VCD and Movie Player. This release can play MPG,VCD,or othfer movie files(such as MPG,DAT,AVI,MOV). Very friendly and menu-driven with full featured control with movie file. It can extract MPG,frame from VCD or MPG file, cutting your favourite part or whole MPG file (or track) to disk when playing (now can extract system stream,or video,audio stream only).

Some features of MPEGPlayer:

- ² Support mostly movie format playing (MPG,DAT,AVI,MOV,M1v,MPV:::).
- ² Many options to fully control the playing operation.
- ² Cut mpg clips to disk, and save them as mpg (video&audio),m1v (video only),or mp3 (audio only) files. supported streams include: mpg system stream, video only stream, and audio only stream.
- ² You can cut some clips, and then join them into on file.
- ² You can capture frames to disk when you are playing. you can merge 4 frames into one big frame by check Merge Soption.
- ² Fully control the playback quality and performance .
- ² You can resize the display window size to avoid some rubbish on your screen edge.

Requirements to run MPEGPlayer

MPEGPlayer need run under WIN 9x. For best results we recommend adjusting your display settings to use a minimum of 16 bit colour (24 bit TrueColor is recommended). Using 8-bit color can cause unusual flickering/flashing color effects. Maybe you need to install some other   device driver so that you can play AVI(need Video for windows), MOV(need QuickTime for windows), ::: etc.

Basic operation

MPEGPlayer bitmap button operating details

Click on the using area(button) above for instruction. Click on the image below for more information about MPEGPlayer.

Configuring Codec

Hot key available

- ² F1   MPEGPlayer configurations
- ² F2   Capture current frame, and save it as BMP or JPG
- ² F4   Normal(original size) or full screen size toggle
- ² F5   Mark in for capture frame
- ² Ctrl+F5   Seek to the Mark in point
- ² F6   Set mark in to start
- ² F7   Set mark out to end
- ² F8   Mark out for capture frame
- ² Ctrl+F8   Seek to the Mark out point
- ² F9   Start /or stop record (cut /extract) MPG clips
- ² F12   Save the recorded clips to disk
- ² PgDn   Forward seek X seconds (using <u>Set time step</u> to set X value)
- ² PgUp   Backward seek X seconds
- ² SPACE   Play or stop playing toggle
- ² HOME   Go to the start
- ² END   Go to the end
- ² INSERT   Go to last file(or track)
- ² DELETE   Go to next file(or track)
- ² UP   Forward Step play Y frames (using <u>Step play by</u> to set Y value)
- ² DOWN   Reverse Step play
- ² RIGHT   Fast play
- ² LEFT   Slow play
- ² PAUSE   Pause or resume toggle
- ² +   Volume up
- ² -   Volume down
- ² ESCAPE   Exit this Player or Saving operation
- ² TAB   Audio control (audio on,off,L,R.)
- ² Ctrl+N   Skip all recordings
- ² Ctrl+O   Open files for playing/cutting/joining
- ² Ctrl+V   Play VCD
- ² Ctrl+X   Skip the files you don't want to joining or playing
- ² Ctrl+J   Join the opened files into one file
- ² Ctrl+D   Open main device menu
- ² Ctrl+B   Capture frames to disk (in the capture range every X seconds capture one file, using F5,F8 to set the capture range***)
- ² Ctrl+I   Seek to I/10 of total time (I=0,1,2,3,4,5,6,7,8,9)
- ² Alt+I   Set Time step in X seconds(I=1s,2s,...,9s,0=25s)
- ² SHIFT+I   Select the index of the opened file to play

How to :::?

Tips and bugs for MPEGPlayer

tips1* How to cut mpg clips to disk?

- ² Ctrl+O to Open the MPG file for cutting
- ² Page Up or Page Down seek to the first point
- ² F9 start to cut this clip
- ² Page Up or Page Down seek to the second point
- ² F9 again to end this clip cutting
- ² go to step 2 to cut second or other clips
- ² F12 save the cutted clips to disk

tips2* How to set display window size?

If you got rubbish on edge of your screen when you run in full screen, now you can resize the display window size to solve this problem. You can resize the window size (x,y,w,h) to suitable value in options. For example, if your display driver is setting at 640X480, then you can set full size parameter to (0,0,648,486) to avoid some rubbish on edge of your screen, Where:

x,y: display window's top left corner

0 w,h: display window's width and height

Notice: you must enable FullSize radio button to active this option.

tips3* How to use other MPEG device?

If you like to use other MPEG device, please enable Other Codec in Codec options, then click Other Codec in main menu.

tips4* How to join the opened files?

- ² CTRL+O to open the files for joining. (while selecting files, press SHIFT or CTRL to enable multi-selection)
- ² CTRL+X to exclude the files you don't like to join/play.
- ² CTRL+J to join the files(exclude the cutted files).

tips5* MPEGPlayer don't auto play next files...

If you have cutted some clips and have not saving them, then MPEGPlayer will stop playing when reaching the end of the current playing file, please use CTRL+N to skip all cutted clips if you want to skip all the cutting operations.

tips6* How to select the index of files/tracks to play?

For example, if you have loaded 250 files for playing, and you want to play some files mmediately, you can do this way:

Press SHIFT+5: select index 5 of files/tracks to playing.

SHIFT+2+5: select index 25 of files/tracks to playing.

SHIFT+1+5+3: select index 153 of files/tracks to playing.

tips7* How to remove MPEGPlayer?

You can open Control Pane, choose add/remove function to remove MPEGPlayer.

tips8* How to use Clip List Editer?

File Name: the source MPG file name.

Cut From: mpg clip cut from, unit is frame.

Cut To: mpg clip cut to, unit is frame.

Total Frames: the total frames of the source MPG(not equal Cut To - Cut From).

What is registration?

MPEGPlayer is a shareware, that means we have made the software available to you for free evaluation. Shareware (non-registered) MPEGPlayer is a "full-featured" release, but unregistered version can only cut 7 sec for every clips (limited max 2 clips), and modes marked with *** are only available in the registered version. If you like this shareware, you are expected to register your copy with us for a small fee.

What registering will you get?
▪ A registration code which will remove all the annoying Shareware Reminder Windows.
▪ Information on upgrades to MPEGPlayer. (For the foreseeable future, and probably forever, all upgrades to MPEGPlayer will be free to registered users.)
▪ The more people who register this shareware, the more incentive to make MPEGPlayer even better.

How can I register?

Registration form

How can I register?

The registration fee for MPEGPlayer is $20 US, or in any stable currency you want (for example, we also accept:French Franc $120, UK $12, Deutsche Mark $40, Australian Dollar $30,Canadian Dollar $30, Danish Krone $140,Dutch Guilder $40, Finish Mark $100, HK Dollar $180, Irish Pound $20, Singapore Dollar $40, Swedish Krona $150, Swiss Frank $30, Japanese Yen $2000, Korean Won $15000, Portugese Escudos $3000, Norwegian Krone $150, etc.)

(1) For money or cash, check orders: Print out and complete the supplied order form, send order form with your user ID and registration fee (check in US dollar only, cash, or money) enclosed in envelope to the author's snail mail address, then you will receive registration code by email.

(2) For online,email or fax orders via credit card: If you like to register via credit card using email or fax, you can press Order button on register dialogue to order your copy, also you can use our online registration system on Kagi:

http://order.kagi.com/?4ZY

If you don't have access to http://www.kagi.com   web site but are interested in learning more about Kagi payment processing services, you can send any email to FAQ@kagi.com and you will automatically receive a complete set of the Kagi Frequently Asked Questions.

Please enclose an additional $5 US if you wish to receive a 3.5 inch floppy disk(or $10 for CDR disc) sent to you, Otherwise you will receive registration code via email.
