

Welcome to [Midi Machine](#), your all-in-one solution for managing and playing CDs, graphics, movies, and sound in one simple interface. [Midi Machine V3.1](#) is even more powerful, faster, and easier to use.

[Midi Machine](#) plays the following files:

- [.MID](#) - Midi music files (and why not? [Midi Machine](#) is named so because of its great midi playing ability.)
- [.RMI](#) - Midi music files (alternate format)
- [.WAV](#) - Wave files, sometimes called digital audio
- [.AU](#) - Sound Files
- [.SND](#) - Sound Files
- [.AIF](#) - Sound Files
- [.MP2](#) - MPEG Compressed Sound Files
- [.AVI](#) - Audio-Video interleave files, or mini-movies
- [.BMP](#) - Bitmap graphic files
- [.WMF](#) - Window metafiles, another type of graphic file
- [.MOV](#) - Movie files
- [.MPG](#) - MPEG Movie Files
- [.ICO](#) - Windows icon pictures
- [.TXT](#) - Text files
- [.RTF](#) - Rich-Text Files
- [.PCX](#) - Another kind of graphic file
- [.PNG](#) - PNG graphic files, a new graphics standard that is taking the world by storm! Gives good compression
- [.JPG](#) - Jpeg images giving you high graphics compression
- CD-Audio tracks.

[Midi Machine](#) is so intuitive that you probably will never need to read the help. But if you do, there's lots of it! We provide:

- 1) Tooltips for toolbar buttons (see instantly what they do!)
- 2) Context-sensitive help using the standard WinHelp engine
- 3) Tips of the day that give advice on harnessing [Midi Machine's](#) power
- 4) Technical documents describing possible problems and solutions

If you should have any problems with [Midi Machine](#), be sure to read the help files. Or, you can contact us on-line:
