

Chrome patch 1.1.1.0

Installation notes:

This patch may be installed on 1.1.0.0 version of Chrome.

Warning!

Current version is not compatible with the previous versions of the game when playing via network. Both the server and client must be of appropriate versions of the game (1.1.1.0) in order to connect.

Saved games from earlier version of the game may not work correctly after installing this patch. To start mission you finished at, please choose Load Game in Main Menu and then click the Mission button to select mission you want to continue from the beginning.

Changes and fixes:

Problems with rendering on Radeon 7500 and Kyro II graphics cards were resolved.

Single player

- Spelling corrections and voice volume
- Minor problems in Containers and Nanovirus missions
- Problems with dying after mission restart
- Minor problems with ladders
- Other minor bugs were fixed

Multiplayer

- Problems with Battledust map (proper respawn, no match draw)
- The round now begins when at least one player is in each team
- Server info option will now work correctly
- Refresh server list problem
- Running over players with vehicles will now work properly
- Other minor bugs were fixed
